

I can't live without my XM Satellite Radio; the addition of instant traffic and weather makes it so much easier for me, and XM does a better job than regular radio, because I can tune in and hear traffic when I want, not when the regular station decides to tell me, and also XM's traffic and weather cover all the areas, not just specific freeways that the helicopter is flying over. The variety overall of XM radio is better than any local station can provide, as is the reception and quality. Plus, I'm SICK of listening to more commercials than programming on regular radio. I pay for this service, and in a country with the First Amendment, it should not be up to the NAB to dictate what I am permitted to hear.. I respectfully urge you to reject NAB's petition 04-160 to limit what type of programming I wish to pay for on ANY satellite radio programming. If NAB can get away with this, what does that say to the cable stations versus networks?
